Subject: Republic Services Landfill/ West Lake landfill

Importance: High

I would like to ask you if you could email me a map of where exactly the odor mitigation construction work such as wells, mainforce lines, membrane locations and others controls are being implemented and developed on the landfill area. During the last EPA's public meeting there was an exhibit showing where the fires/odor problems are located or originating from and location of the Unit with radioactive impact; could you email me a copy of this map?

Could you email me a copy of your presentation as per this public meeting?

Based on the Order issued by MDNR as of February 1, 2013 the Landfill needs to develop plans to remedy violations and nuisances; we need information about locations and types of the remedies.

I appreciate your assistance. Thank you so much.
